Table of Contents

Preface.....

Dedication .....

Section 1
Cyber Physical Systems: Vulnerabilities, attacks and Threats

Chapter 1
Improving security and privacy for Cyber-Physical System .....

Chapter 2
Vulnerability Analysis for Cyber-physical systems.....

Chapter 3
State Estimation based Attack Detection in Cyber Physical Systems: Limitations and Solutions.....

Section 2
Security and Privacy in Cloud and Embedded Systems for Cyber Physical Systems

Chapter 4
Towards Secure Software-defined Networking Integrated Cyber-Physical Systems: Attacks and Countermeasures .....

Chapter 5
DDoS defense in SDN-based Cyber-Physical Cloud.....

Chapter 6
Detecting Pilot Contamination Attacks in Wireless Cyber-Physical Systems.....

Chapter 7
Laboratory Exercises to Accompany Industrial Control and Embedded Systems Security Curriculum Modules .....

Section 3
Security and Privacy in Big Data Cyber-Physical systems

Chapter 8
Security and Privacy in Big Data Cyber-Physical systems .....

Chapter 9
Big Data Technologies Supported Generic Visualization System in an Enterprise Cyber-Physical Environment .....

Chapter 10
Searching for IoT Resources in Intelligent Transportation Cyber-Space (T-CPS) - Requirements, Use-cases and Security Aspects .....

Section 4
Cybersecurity in Cyber-Physical Systems

Chapter 11
Evaluating the Reliability of Digital Forensics Tools for Cyber-Physical Systems.....

Chapter 12
Point of Sale Device Attacks and Mitigation Approaches for Cyber Physical System .....

Chapter 13
Cyber-Profiteering in Cloud of Smart Things .....

Compilation of References .....

About the Authors .....

Index .....
